

Work station assessments

CRYSTAL PALACE
PHYSIO GROUP

.....
Making People Better

In any Organization, Employee's who suffer pain and aching from Musculoskeletal (MSK) Conditions are less productive in their workplace, and are at a higher risk of going and/or staying off sick. Crystal Palace Physio Group recognizes this risk, and is best placed to assess and recommend adjustments that are in line with best practice.

Our Service

- We offer a fully comprehensive nationwide on-site service.
- Assessments are performed by Occupational Physiotherapists with a special interest/qualifications in Ergonomics
- The service is designed to facilitate easy referral and fast turnaround of reports and is quality assured.
- Our most commonly conducted assessment taking 45-60 minutes and includes:
 - Job/Task analysis
 - Assessment of musculoskeletal complaints
 - H.S.E. compliance check and identification of urgent non H.S.E. compliance issues
 - Ergonomic analysis of task seating and Anthropometric measurements
 - Risk assessment
- A detailed report is provided for management which includes:
 - Details of the issues found
 - Information given and changes made during the assessment
 - Practical and workable recommendations for the Employee and Manager

Benefits for you

- Significantly reduce the time and cost associated with managing an in-house WSA service
- Fast and easy access to high quality Assessors
- We work to strict Service Level Agreements
- Comprehensive Management Information of measured activity and timelines
- A flexible and customer-focussed approach to service delivery in order to meet your organization's needs
